**Almatec® Launches Web Site Dedicated to Solar Industry**  
*Site highlights how E-Series pumps can maximize solar-cell production*

**Kamp-Lintfort, Germany, July 12, 2011** — Almatec®, a premier manufacturer of air-operated double-diaphragm (AODD) pumps, is pleased announce the launch of a new Web site specifically for the growing solar industry. The new site is located at [www.almatecsolar.com](http://www.almatecsolar.com), and is dedicated to the production of photovoltaic solar cells, and how Almatec E-Series AODD Pumps can play a pivotal, cost-saving role in their manufacture.

As the search for efficient renewable energy sources continues apace, the use of solar energy, which is the cleanest, most renewable energy source in the world, will continue to grow. This growth is fueled by advances in solar-energy technology that allow the power of the sun to be harnessed like never before. Recognizing this solar potential, Almatec has designed its plastic, solid-body E-Series pumps to perform exceptionally well in the harshest solar-cell manufacturing processes, including those that require the handling of harsh chemicals, caustics and slurries.

All of the benefits that Almatec E-Series pumps bring to solar-cell manufacture are clearly spelled out in the new Web site. The Technology link includes everything you need to know about the photovoltaic industry, from its history to a breakdown of all stages of its manufacturing process. The Products section explains how Almatec E-Series pumps are the best choice for these types of applications. The Success Stories and Media areas contain case studies, “how-to” videos and the latest industry news. Finally, a special Distributor section allows interested visitors to locate the Almatec distributor nearest them.

For more information on Almatec®, please visit [www.almatec.de](http://www.almatec.de). Almatec is an operating company within Pump Solutions Group (PSG™). For more information on PSG, please go to [www.pumpsq.com](http://www.pumpsq.com).

*Almatec Maschinenbau GmbH is one of the world's leading manufacturers of pneumatic diaphragm pumps. Today, Almatec owns numerous patents and has one of the largest ranges in the field of pneumatic diaphragm pumps. Almatec—headquartered in Kamp-Lintfort, Germany—is a member of Dover Corporation's Pump Solutions Group (PSG™).*
