## Mouvex® Introduces B200 Model Screw Compressors

*New Liquid Transport Screw Compressor Unveiled at IAA Show in Germany*

**Auxerre, France – September 23, 2010** — Mouvex®, a leading manufacturer of positive displacement pumps and compressors for the transfer of liquids or dry bulk products, is proud to announce the introduction of its new B200 Model Screw Compressor. These compact and lighter-weight, oil-free compressors have been designed with non-contacting internal parts, enabling them to safely deliver high flow rates and wide speed ranges from 120 to 180m<sup>3</sup> per hour.

The B200 compressors also benefit from the “plug-and-play” installation that requires no prop or drive shaft and no mounting bracket, while they are still suitable with standard PTOs and available in both hydraulic and electric-drive versions. The compressors offer three direct-mounting options: PF Option with PTO Flange which features a splined shaft for direct flange-mounting on the PTO; PS Option with PTO Shaft with a straight-keyed shaft for electric motor drive mounting; and an HY Option that has a female spline shaft for hydraulic motor drives.

These features make the B200 compressor ideal for a wide array of applications that involve the unloading of chemicals, solvents, bitumen/asphalt, food products, cosmetics and pharmaceuticals. The design of the B200 compressor enables faster off-loading, slower engine speeds, reduced maintenance, not exposed rotating shafts and an integrated torque-limiter. The compressors are also covered by a three-year warranty.

“The B200 is fittable on a truck and has been designed to install directly on the PTO,” said Philippe Wouters, Director of Sales Transport & Energy—EMEA for PSG. “This makes life easier for the operator since it is easy to fit on the truck and there is nothing that needs to be modified.”

For more information on Mouvex’s B200 Model Screw Compressors, please go to [www.mouvex.com](http://www.mouvex.com). Mouvex is a member of the Dover Corporation’s Pump Solutions Group (PSG™). For more information on PSG, visit [www.pumpsq.com](http://www.pumpsq.com).

*Mouvex® was incorporated in 1906 and is a leading manufacturer of positive displacement pumps and compressors for the transfer of liquids or dry bulk products worldwide. Through a global network of distributors and original equipment manufacturers, Mouvex serves the following markets: refined fuels, oilfield, energy, food /sanitary, military, transport and chemical process. Mouvex—headquartered in Auxerre, France—is a member of Dover Corporation’s Pump Solutions Group (PSG™).*
