MH6 Screw Compressor from Mouvex® and Hydrocar® Earns Prestigious Trailer 2011 Award

Innovative dry-bulk trailer solution recognized in Best Accessory category

Auxerre, France & Modena, Italy – December 12, 2011 — Mouvex® and Hydrocar®, along with distributor Humblet Hydraulics of Kontich, Belgium, are extremely proud to announce that the MH6, the world's first combination screw compressor/power takeoff (PTO) unit for the dry-bulk transport market, has been named the recipient of Trailer Award 2011: Best Accessory. The recognition came at Trailer 2011, the international trade fair for trailers and equipment, which was held from Nov. 25-29 at the Kortrijk Xpo in Kortrijk, Belgium.

The Trailer Awards were designed to encourage innovation in the development and use of equipment in road-hauling operations. The Best Accessory Award goes to the company that produces innovative truck equipment that optimizes costs and benefits, can be used in a variety of applications, maximizes safety and helps reduce the overall weight of the trailer. An international jury composed of professional journalists and potential users evaluated the entrants and determined that the MH6 best met the criteria for the award.

The MH6 Screw Compressor/PTO received the Trailer Award 2011: Best Accessory at Trailer 2011.

"This is quite the honor and one that we are extremely pleased to receive," said Philippe Wouters, Director of Sales Transport & Energy-EMEA for Mouvex and its parent company, Pump Solutions Group (PSG®). "The MH6 was cooperatively designed by Mouvex and Hydrocar to optimize performance in dry-bulk handling applications and we are happy to be recognized with this prestigious Trailer 2011 award."

The [MH6](#) is the culmination of four years of cooperative effort between Mouvex and Hydrocar. It has been designed to be compatible with a truck's gearbox, while at the same time offering a 70% weight reduction when compared to traditional screw compressors. The MH6 combines [Hydrocar's innovative PTO](#) device and the [Mouvex screw compressor](#) principle, resulting in a solution for dry-bulk fleets that is lighter and less expensive than traditional equipment. Thanks to the lighter overall weight of the system, the MH6 is able to provide fleets with increased turnover per truck per year that equates to improved revenues, while also meeting the requirements of the European Union's upcoming Euro 6 legislation, which goes into full effect in 2014 and will require vehicles to be lighter and use less fuel.

The MH6 Screw Compressor/PTO is approved by Mercedes Benz and compatible with ZF, DAF, Iveco, MAN and Renault Trucks. (Right) The MH6 is pictured here installed in a Mercedes Benz.

About Mouvex & Hydrocar:

Mouvex® was incorporated in 1906 and is a leading manufacturer of positive displacement pumps and compressors for the transfer of liquids or dry bulk products worldwide. Through a global network of distributors and original equipment manufacturers, Mouvex serves the following markets: refined fuels, oilfield, energy, food /sanitary, military, transport and chemical process. Mouvex—headquartered in Auxerre, France—is a member of Dover Corporation’s Pump Solutions Group (PSG®).

Hydrocar a member of Interpump Hydraulics SpA is headquartered in Nonantola (MO), Italy, with a very precise purpose: offer new power take-off mechanisms and devices to a variety of hydraulic systems for industrial vehicles. The hundreds of models created over the years and the many configurations applied to its components allow Hydrocar to confidently state that this objective has been positively fulfilled. The constantly increasing number of trucks around the world equipped with Hydrocar PTOs and pumps offers the greatest satisfaction for so many years of hard work and commitment.
