Wilden® Increases AODD Pump Performance With Development of Full Stroke PTFE Diaphragms

Grand Terrace, CA – December 14, 2010 — Wilden®, the worldwide leader in air-operated double-diaphragm (AODD) pump technology, has announced the availability of its new Full Stroke PTFE (Teflon®) Diaphragms for use on all of its standard-setting AODD pump lines.

The full-stroke design of these new diaphragms results in improved pump performance. This is the result of increased product displacement per stroke, translating into greater flow rates and higher efficiencies than are found in pumps that operate with reduced-stroke PTFE diaphragms.

“Wilden continues to set the industry standard with the incorporation of our Full Stroke PTFE Diaphragms into our line of AODD pumps,” said Greg Duncan, Director of Engineering for Wilden Pump & Engineering. “This latest enhancement provides our customers with a full-stroke PTFE AODD solution that is the best in the industry.”

Wilden's new Full Stroke PTFE Diaphragms (pictured on left) provide increased product displacement per stroke versus older, lower flowing models (pictured on right).

Another benefit of the new Full Stroke PTFE Diaphragms is that they use the same shaft and piston combinations as Wilden's standard rubber and TPE (thermoplastic elastomer) diaphragms, meaning they are easily retrofittable to existing pumps without the need for any extra components. The new Full Stroke PTFE Diaphragms are available on 1-, 1.5-, 2-, and 3-inch pumps.

For more information on any of Wilden's AODD pump products, please go to www.wildenpump.com. Wilden is an operating company within Dover Corporation's Pump Solutions Group (PSG™). For more information on PSG, please go to www.pumpsg.com.

Jim Wilden, founder of Wilden Pump and Engineering Co., revolutionized the pumping industry when he invented the air-operated double-diaphragm pump in 1955. Since then, Wilden has created a line of distinctive pumps that have proven to be trustworthy solutions to pumping applications in a wide variety of industries. Wilden—headquartered in Grand Terrace, California, USA—is a member of Dover Corporation's Pump Solutions Group (PSG™).
