## Wilden Pro-Flo X™ HS (Hygienic Series) Pumps

*Deliver sanitary operation, peace of mind in food-processing applications*

**Grand Terrace, CA – March 10, 2011** — Wilden®, the worldwide leader in air-operated double-diaphragm (AODD) pump technology, continues to dedicate itself to creating the most energy-efficient products that offer higher performance, lower operational costs and performance flexibility for a wide array of industries. With that in mind, Wilden's Pro-Flo X™ HS (hygienic series) stainless steel line of AODD pumps has been designed specifically to deliver the sanitary performance that is necessary in a wide variety of food-processing operations.

The Pro-Flo X™ HS pumps offer the versatility, safety and capability needed to efficiently pump the full range of viscosities, solids and shear-sensitive products that are used in food processing. These pumps have been engineered to meet the highest sanitary standards and requirements in the food-processing industry, including those spelled out by EHEDG, 3A, CE, ATEX. USP Class VI and FDA CFR 21.177.

Wilden Pro-Flo X™ HS AODD pumps do not contain any mechanical seals or rotating parts. This design eliminates any nooks and crannies where product components can be trapped and compromise the sanitary operation of the pump. The Saniflo pumps also feature integral-piston PTFE diaphragms, which enhance the cleanability of the pump's liquid path. The Saniflo's components are constructed of passivated 316L stainless steel, while it also features Wilden's patent-pending Pro-Flo X™ air-distribution system (ADS) that allows the user to control flow rates with the turn of a dial, resulting in reduced energy usage and true cost savings.

For more information on Wilden's Pro-Flo X™ HS (Hygienic Series) AODD Pumps, please go to [www.wildenpump.com](http://www.wildenpump.com). Wilden is an operating company within Dover Corporation's Pump Solutions Group (PSG™). For more information on PSG, please go to [www.pumpsq.com](http://www.pumpsq.com).

*Jim Wilden, founder of Wilden Pump and Engineering Co., revolutionized the pumping industry when he invented the air-operated double-diaphragm pump in 1955. Since then, Wilden has created a line of distinctive pumps that have proven to be trustworthy solutions to pumping applications in a wide variety of industries. Wilden—headquartered in Grand Terrace, California, USA—is a member of Dover Corporation's Pump Solutions Group (PSG™).*
