Wilden® to Showcase Pro-Flo X™ HS Pumps at Process Expo *AODD pumps provide versatility, safety, and energy savings for food processors*

Grand Terrace, CA – October 11, 2011 — Wilden®, the worldwide leader in air-operated double-diaphragm pump technology, is pleased to announce that it will be exhibiting in Booth 3608 at the upcoming Process Expo. The Process Expo, which is sponsored by the Food Processing Suppliers Association, will be held from Nov. 1-4 in the South Hall of Chicago's McCormick Place.

Billed as "The Global Food Equipment & Technology Show," the Process Expo is the top worldwide tradeshow for leaders in the food-and-beverage industry, and the perfect event for Wilden to highlight its standard-setting hygienic pumps and equipment. With that in mind, Wilden will be showcasing its Pro-Flo X™ HS (Hygienic Series) Air-Operated Diaphragm (AODD) Pumps at the Process Expo.

Wilden's Pro-Flo X™ HS pumps are constructed of stainless steel and designed to deliver the sanitary performance necessary in a wide variety of food and beverage processing operations. HS pumps efficiently handle a full range of viscosities, solids and shear-sensitive products in food and beverage processing. The design of the pumps does not contain any mechanical seals or rotating parts, which eliminates any areas where product residue can be trapped and compromise the sanitary operation of the pump.

HS pumps have also been engineered to meet the industry's high sanitary standards and requirements, including those set by EHEDG, 3A, CE, ATEX, USP Class VI and FDA CFR 21.177. The pumps also feature Wilden's patented Pro-Flo X™ air-distribution system (ADS) that allows the user to control air consumption and flow rates with the turn of a dial, resulting in reduced energy usage and true cost savings. In addition to its Pro-Flo X™ HS pumps, Wilden Saniflo™ Vacuum-Controlled (VC) Series Metal Pumps and Saniflo™ Drum Unloader System (DUS) have also been designed with food and beverage processing applications in mind and will be on display at the Process Expo.

For more information on any of Wilden's AODD pump products, go to www.wildenpump.com. Wilden is an operating company within Pump Solutions Group (PSG™). For more information on PSG, please go to www.pumpsg.com.

Jim Wilden, founder of Wilden Pump and Engineering Co., revolutionized the pumping industry when he invented the air-operated double-diaphragm pump in 1955. Since then, Wilden has created a line of distinctive pumps that have proven to be trustworthy solutions to pumping applications in a wide variety of industries. Wilden—headquartered in Grand Terrace, California, USA—is a member of Dover Corporation's Pump Solutions Group (PSG™).
