Wilden® Names Rob Guertin New Marketing Manager

Grand Terrace, CA – September 13, 2010 — Wilden®, the worldwide leader in air-operated double-diaphragm pump technology and an operating company within Dover Corporation's Pump Solutions Group (PSG™), announced that Rob Guertin has been promoted to the position of Marketing Manager. In this position, he will report to Walter Bonnett, PSG's Vice President of Global Marketing.

In this new role, Guertin will develop and execute global and regional marketing plans that will be designed to enhance growth and extend the Wilden brand worldwide. He will work closely with the PSG Sales and Marketing teams, as well as with Wilden's engineering department, to promote and educate sales channel partners and end-users on Wilden's many lines of industrial pumping products.

"Rob's technical expertise in air-operated double-diaphragm (AODD) pump technology, and experience with other positive-displacement pump technologies, will have an immediate impact for Wilden as he assumes his new role within the organization," said Bonnett. "We are confident that this will result in exciting new growth opportunities for the Wilden brand."

Guertin comes to his new position after spending the past 24 years with Wilden, most of that time in research and development, testing and marketing. His last nine years have been spent working with the Wilden and PSG marketing teams as a Technical Marketing Supervisor and, most recently, as PSG's Research Marketing Manager.

For more information on Wilden, please go to www.wildenpump.com. Wilden is an operating company within Dover Corporation's Pump Solutions Group (PSG™). For more information on PSG, please go to www.pumpsg.com.

Jim Wilden, founder of Wilden Pump and Engineering Co., revolutionized the pumping industry when he invented the air-operated double-diaphragm pump in 1955. Since then, Wilden has created a line of distinctive pumps that have proven to be trustworthy solutions to pumping applications in a wide variety of industries. Wilden—headquartered in Grand Terrace, California, USA—is a member of Dover Corporation's Pump Solutions Group (PSG™).
