

Almatec® Announces Headquarters Relocation to Accommodate Company Growth

Duisburg, Germany, 5 November 2018 — [Almatec®](#), part of [PSG®](#), a Dover company and premier manufacturer of air-operated double-diaphragm (AODD) pumps and Quattroflow™ quaternary diaphragm pumps, announced today that it has moved into new corporate headquarters located at Hochstraße 150-152 in Duisburg, Germany. The new headquarters will accommodate the growing business by providing roughly 70% more space, including a much larger manufacturing facility and a state-of-the-art ISO Class 7 cleanroom.

“This move is a big milestone for our company, employees and customers will all benefit from the opportunities this new facility provides,” said Rainer Wulf, Managing Director for Almatec. “Our company is growing, and we plan to continue this growth into 2019 and beyond. With our new headquarters, we now have a suitable location to support that growth. In addition, the significantly larger space provides current and future employees with an attractive working environment that will provide ample opportunities for collaboration and innovation.”

Providing 1,600 square meters (17,200 square feet) of office space and 3,750 square meters (40,350 square feet) of manufacturing floor space, Almatec’s new location nearly doubles the company’s previous manufacturing footprint. The new space has also been designed to increase efficiency for all departments, and reflects Almatec’s commitment to providing world-class AODD and quaternary diaphragm pumps while delivering industry leading customer service.

“The new manufacturing space will allow us to increase our production capabilities and meet the demand of increasing orders from customers around the world,” added Wulf. “Our team is excited about the growth we’ve been experiencing, and this expansion shows a commitment to build on our team’s successes and keep our momentum going strong. And while our address may be changing, what remains the same is the outstanding quality of our Almatec and Quattroflow pumps, and our personal commitment to satisfying our customers.”
