

From the Experts in Mission Critical Flow Solutions

Trailer-mounted pump designed for the demanding needs of U.S. Military operations

**This flexible workhorse can be taken
anywhere battle ops dictate.**

- Flow range from 0 – 600 gpm
- Exceptional efficiency across all flow rates
- Standalone operation at any pressure to 150 psi (350 ft. of head)
- Series operational capability provides pressure to 300 psi (700 ft. of head)
- Strong dry lift capability; self-priming with no priming chamber required
- Hydraulic drive and control
- Includes auxiliary hydraulic pump for downhole lift to 40 feet
- Flexible 5-fuel capability
- Can be towed, sling-lifted, or transported in a TRICON
- Proven off-road capability

**When your application demands
tough performance in extremely demanding
field operations . . .**
