This is a SAFETY ALERT SYMBOL.
When you see this symbol on the product, or in the manual, look for one of the following signal words and be alert to the potential for personal injury, death or major property damage

**DANGER**
Warns of hazards that WILL cause serious personal injury, death or major property damage.

**WARNING**
Warns of hazards that CAN cause serious personal injury, death or major property damage.

**CAUTION**
Warns of hazards that CAN cause personal injury or property damage.

**NOTICE:**
Indicates special instructions which are very important and must be followed.

---

**NOTICE:**
Blackmer pumps MUST only be installed in systems which have been designed by qualified engineering personnel. The system MUST conform to all applicable local and national regulations and safety standards.

This manual is intended to assist in the installation and operation of the Blackmer pumps, and MUST be kept with the pump.

Pump service shall be performed by qualified technicians ONLY. Service shall conform to all applicable local and national regulations and safety standards.

Thoroughly review this all instructions and hazard warnings in this manual and the appropriate model pump manual, BEFORE performing any work on the Blackmer pump.

Maintain ALL system and pump operation and hazard warning decals.

---

Blackmer pump manuals and parts lists may be obtained from Blackmer’s website (www.blackmer.com) or by contacting Blackmer Customer Service.

---

**WARNING**
Disconnecting fluid or pressure containment components during pump operation can cause serious personal injury, death or major property damage

**WARNING**
Failure to disconnect and lockout electrical power before attempting maintenance can cause shock, burns or death

**WARNING**
Failure to disconnect and lockout electrical power or engine drive before attempting maintenance can cause severe personal injury or death

**WARNING**
Failure to relieve system pressure prior to performing pump service can cause serious personal injury or property damage.

Systems with meters will still be pressurized even after the hose is emptied

**WARNING**
Failure to set the vehicle emergency brake and chock wheels before performing service can cause severe personal injury or property damage.

**WARNING**
If pumping hazardous or toxic fluids, system must be flushed and decontaminated, inside and out, prior to performing service or maintenance.
SEAL REPLACEMENT GUIDE

1. Always refer to the proper pump's Parts List and Installation, Operation and Maintenance Instructions BEFORE attempting any maintenance.

2. In general, replace the entire seal assembly including O-rings.

3. A mechanical seal is a precision device. Use care when handling to protect the seal faces.

4. Keep all oil, grease and dirt off the seal faces.

5. If necessary, use a clean tissue (not a shop cloth) and alcohol to clean the seal faces.

6. Before installing a new seal, clean the seal recess area and remove any burrs or nicks from the shaft. After cleaning, lightly oil the seal recess area and shaft.

7. Use care when sliding the seal face or seat over the shaft to avoid damage.

8. The drive tangs of the seal jacket, the notches in the rotating seal face and the pin on the stationary seat MUST all be properly engaged.

9. Replace the seal as shown in the appropriate pump Installation, Operation and Maintenance Manual.
