

Do More with Less!

Introducing the CC10-24 Series: The ideal solution for the delivery & distribution of petroleum products.

The new enhancements to the CC10-24 have been specifically designed to make the pump smaller, lighter (70.6 lbs./32 kg), quieter (72 dBA) and more environmentally friendly while increasing pump efficiency and reducing delivery times.

Along with these advancements, the CC10-24 features an integrated by-pass designed to protect against excessive pressures and overheating, and is equipped with a 500-micron strainer. Mouvex CC10-24 pumps are also virtually maintenance free, reversible and have been engineered with double ball bearings for longer pump life. Additionally, these pumps are ATEX certified and available with a 3-year warranty.

Mouvex CC10-24 pumps are offered in cast iron and steel, and are available with flow rates up to 42 m³/h (185 gpm), pressures to 145 psi (10 bar) and pump speeds to 1,500 rpm.

Optional features include mechanical by-pass with spring 72.5 or 145 psi (5 or 10 bar), pneumatic by-pass and SAE A hydraulic trunk.

Mouvex® CC10-24 Series Rotary Vane Pumps

Developed as a vehicle-mounted solution for the delivery of petroleum products by trucks and transports, the Mouvex® CC10-24 includes all of the same cutting-edge features and benefits as the Mouvex CC8 pump while incorporating a variety of new enhancements.

500 μ Strainer

Where Innovation Flows

CC10-24 Series Rotary Vane Pumps

The Mouvex solution for the tank truck transfer of petroleum products

Because each kilo counts!

More pressure = More flow =
More deliveries!

Less than 72dB(A) for more comfort and
the best customer impression!

Less power = best efficiency.
Provides just the flow requested, not more,
for greater fuel savings!
