Neptune 600 and 6000 Series Hydraulic Metering Pumps are designed for high-pressure, high-volume applications and are available in both simplex or duplex models. The 600 and 6000 Series pumps have an adjustable pump capacity through the use of a micrometer dial that can be varied while pump is running or stopped. These pumps also utilize a hydraulically-balanced PTFE diaphragm that eliminates stress.

Variable Oil By-Pass™ Stroke Adjustment provides better valve performance when compared to variable linkage designs. This increase in performance is the result of valve checks that provide extra time to seat even in viscous liquids since they are idle during the by-pass portion of the suction and discharge strokes.

**FEATURES AND BENEFITS**

- EZE-CLEAN™ valves are removable without disturbing piping
- Power train operates submerged in oil for extended service
- Accepts standard 56C motor
- Max capacity up to 240 gph (908.5 L/h)
- Max pressure up to 4,000 psi (275.8 bar)
- Material of Construction: 316SS, C-20, PVDF, PVC

**OPTIONS**

- Capacity control options include electric stroke length adjustment and variable speed drives

** ECCN 2B350, Export License may be required.
*** 3-phase motor required with motors up to 1 hp.

To select correct motor from the chart on the left, determine the following:
- Horsepower requirement from chart above
- Power supply voltage and phase
- Enclosure requirement (options available in all 600 series pump sizes)
- Include the different types of enclosures

Neptune offers Totally Enclosed Fan Cooled (TEFC), Explosion Proof (EXP), and Chemical Plant Severe Duty (CPSD) enclosures.

* PVC head pumps satisfactory for temperatures up to 125°F (52°C).
** Special materials available for services not compatible with ceramic.

NOTES

1. **CAPACITY**: Capacity figures are based on water using 1,725 rpm motor. Capacity will decrease by approximately 1.5% for each 100 psi (6.9 bar) increase in pressure.
2. **ACCURACY**: Accuracy is ±1% of full scale over the range of 10% to 100% of capacity.
3. **TEMPERATURE/VISCOSITY**: Contact factory for temperatures over 200°F (93°C) or viscosity greater than 1,000 cP.

DIMENSIONS

ORDERING INFORMATION

When ordering, the following information is required:
1. Description of liquid to be pumped, which includes:
   - Chemical name
   - Concentration
   - Viscosity
   - pH and temperature of solution
2. Maximum, normal and minimum pump capacity
3. Discharge pressure
4. Suction conditions
5. Motor characteristics

Models 635/637 (316SS & C-20 Heads)

Models 647 (316SS & C-20 Heads)

Models 635/637/647 (PVC & PVDF Heads)

Models 635/637 (PVC & PVDF) Models 647 (All Materials)
Additional Solutions by Neptune

7100 SERIES
Mechanically-actuated diaphragm metering pumps are self-priming with suction lifts to 20 feet (6.1 m) and capacities to 300 gph (1,135.6 L/h). For water, wastewater and process applications.

ELECTRIC STROKE CONTROL
The flow rate of any Neptune hydraulic metering pump can be controlled automatically by a process instrument, or manually from a remote location, using the Electric Stroke Control to adjust stroke length. The Neptune Electric Stroke Control is a one-piece, self-contained Electric Positioner mounted on the pump.
- 60/50 Hz, 110/220 V
- Explosion-proof motors available
- Unit follows 4-20 mA or 1-5V signal
- Adjustable ratio signal to stroke 1:2 or 2:1
- Direct (forward) or indirect (reverse) response to changing signal
- Manual override in event of instrument signal or power loss
- Note: Can be added on only one head of duplex pumps.

CHEMICAL FEED SYSTEMS
For a more complete wastewater application solution, Neptune offers packaged chemical feed systems.

POLYMER BLEND & FEEDS
Polymaster™ dilutes, mixes and thoroughly activates emulsion, dispersion and solution polymers including new high molecular weight products. Our specifications are designed to meet your needs.

PORTABLE MIXERS
Neptune offers mixers for use with tanks, drums, pails and totes. Direct-drive and gear-drive models from 1/20 HP through 5 HP.

BACK PRESSURE & PRESSURE RELIEF VALVES
For optimal performance and to protect your equipment, Neptune offers back pressure and pressure relief valves.
- Available in PVC, 316SS, PVDF, and C-20 materials
- Standard sizes include 1/2" through 1-1/2" options

HIGH-PRESSURE INJECTION QUILLS
Used to inject chemicals pumped into turbulent-flow zone of high-pressure water or steam lines.
- Available in PVC, PVDF, 316SS and C-20 materials
- Special lengths are available up to 24" for CPVC and PVDF; up to 36" for 316SS and C-20

SAMPLE COOLERS
Cool hot water or steam samples for easy handling and effective sample collection. Suitable for use on hot water, saturated steam or super-heated steam services.
- Available in 316SS and Inconel materials
